

INGENIEURÖKOLOGISCHES
PLANUNGSBÜRO

 Lorenz-von-Stein-Ring 1-5 24340 Eckernförde

References: Environmental planning

- We have more than 20 years of practical experience in the field of environmental planning. Check our homepage for more information.
- Landscape planning and assessment: We have been working on municipal level, and on project -scale level in landscape planning since 1993. The process of landscape planning is implemented by state and federal law in Germany. This approach includes ecological assessment, evaluation, strategic and local green infrastructure planning, and implementation.
- Environmental impact studies: We have done full scale EIS for different development projects in Germany.
- Landscape design: We have done various project, for public and private clients. Our portfolio includes site appraisal, feasibility studies, scheme options, design, and management.
- Recreation and Tourism. Projects so far involved design of camping sites, golf courses, outdoor museum s, and playgrounds.
- Educational trails and parks: Planning in order to experience nature with all one 's senses. Based on the work of Cornell, a lot of effort is taken in Germany to establish so called "Naturerlebnisräume".
